

Traditional high-dimensional path

Single ICU-admission anchor

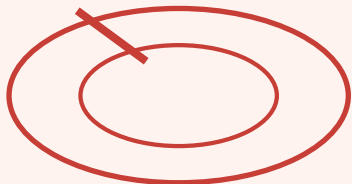

Non-competing-risk framing

70 high-dimensional features

eICU calibration slope = 0.0728

External calibration collapse

P15 clinically aligned path

Dual anchors: t_{ICU} + t_{sepsis}

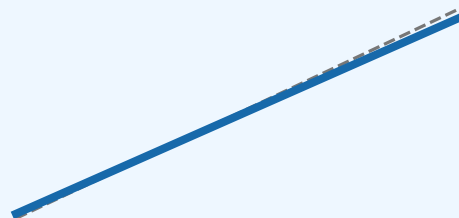

Competing outcomes: death vs alive discharge

15 clinically parsimonious variables

eICU AUROC 0.8103 | AUPRC 0.1892 | slope 1.0031

Near-ideal external calibration
